October 23, 2021

To whom it may concern,

Your employee has been evaluated under my supervision in the Cantina Medical Clinic at Chukchansi Park. The patient has undergone an extensive evaluation and has been diagnosed with Taco Euphoria.

This diagnosis is in result of enjoying a variety of tacos, dancing to great music and bragging about having better tacos than Santa Barbara. Your employee is in great spirits and we are glad they came to us about how they were feeling during this time.

I advise the patient spend the next few days resting and regaining both physical and mental strength after their recent visit to the Chukchansi Park medical clinic. The current symptoms experienced by this patient should return to normal by Wednesday, October 27, 2021.

If you have any questions, please call the offices at the number above.

Sincerely,

DR. ALBERT PASTOR MD, PHD
